Digital Literacy Project Report

Digital Literacy Project Report

Name: Shahzad Ahmed

Registration Number: 25BSA10124

Branch: CSE in Cloud Computing and Automation

Year: 1st Year

Course Code: CSE0001

Date: 26th March 2026

📌 INTRODUCTION

This project is based on the concept of digital literacy and its importance in today's world. As a Student Digital Ambassador, the goal was to create awareness about safe and responsible use of digital technologies.

The Digital Literacy Project aims to develop essential skills needed to use digital technologies safely, responsibly, and effectively. Through this project, students explore professional online platforms, digital communication practices, collaboration tools, and cyber safety awareness. The activities help build a strong digital presence while promoting responsible behavior in the online environment.

📌 TASK 1

In this task, an infographic was created using an online design tool to explain the concept of digital literacy and its importance for students. The infographic included topics such as safe internet practices, useful digital tools, and professional online behavior. This activity helped improve creativity and understanding of how visual content can be used to spread awareness effectively.

📌 TASK 2

For this task, professional profiles were created on platforms such as GitHub, LinkedIn, and Kaggle. These platforms help students showcase their learning progress and connect with academic and professional communities. Creating these profiles highlighted the importance of maintaining a professional digital identity from the beginning of college.

📌 TASK 3

In Task 3, a beginner coding challenge was completed on an online coding platform to gain practical exposure to problem-solving. Additionally, a Digital Literacy Awareness Quiz was created using Google Forms to understand collaboration tools and data collection methods. This task

demonstrated how digital platforms support academic learning and teamwork.

📌 TASK 4

Poor digital communication can lead to misunderstandings. For example, sending an email without a subject or proper greeting can appear unprofessional.

To avoid such issues, one should follow proper email etiquette, use clear language, and maintain a respectful tone. This ensures effective communication.

📌 TASK 5

While researching cybercrime, I was surprised by how easily people fall victim to phishing attacks. Many users are unaware of fake emails and links.

As a result, I will be more cautious while using the internet and avoid sharing personal information. This project has increased my awareness of online safety.

📌 CONCLUSION

This project helped me understand the importance of digital literacy and how to use digital tools responsibly. I learned about online safety, professional communication, and building a digital presence.

Overall, this project improved my awareness and skills, which will be useful in my academic and professional journey.
